

Guilherme Frare Clemente

Full Stack Developer · Mid-Level (Pleno)

linkedin.com/in/guilherme-clemente · github.com/GuiSebax · guiclemente2003@gmail.com · guilherme-clemente-dev.vercel.app

Remote (Brazil, GMT-3): flexible overlap with US/EU business hours

PROFILE

Mid-level (Pleno) Full Stack Developer with hands-on experience since 2023, building interfaces with React, Next.js, and TypeScript and backend services with Spring Boot, Node.js, and PostgreSQL. Currently at Accion Sistemas, designing REST APIs and dashboards for a B2B commercial management platform; previously built a public-health surveillance system adopted by SESA/PR during a university internship. Comfortable owning a feature end-to-end (API design, relational data modeling, and component architecture) in agile (Scrum) teams.

TECHNICAL SKILLS

- **Core stack:** React, Next.js, TypeScript, Node.js, Spring Boot, PostgreSQL
- **Frontend:** JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite, Axios, Angular, React Native, Micro-frontends
- **Backend & APIs:** NestJS, Express, Fastify, FastAPI, Java, Python, REST API, JWT, Prisma ORM, Drizzle ORM, Redis, BullMQ
- **Databases:** SQL, MongoDB, SQLite, data modeling, RLS (Row Level Security), Supabase
- **Testing:** Cypress (E2E), automated testing
- **DevOps & Tools:** Docker, AWS (EC2, S3), CI/CD, Git, Shell Script, Postman, Vercel, Railway
- **Integrations:** Stripe, Resend, Clerk, Zod, OpenAI API
- **Soft Skills:** Technical communication, self-management, teamwork, leadership, proactivity, teaching

PROFESSIONAL EXPERIENCE

Full Stack Developer (Pleno / Mid-Level) · Accion Sistemas

2025 – Present · accion.com.br

- Designed and implemented REST APIs integrating 25 modules of the Seven+ platform, powering the order and quote management module and the product registration/listing screens.
- Built the sales-goal tracking and daily performance dashboard now used by 10 sales teams, giving managers real-time visibility into goal attainment (React, Tailwind CSS, Spring Boot, PostgreSQL).
- Contributed to architecture and data modeling decisions as a Pleno-level developer, helping define development standards adopted across the team.
- Adopted a micro-frontend architecture for the Seven+ platform and set up CI/CD pipelines for automated build and deployment, streamlining releases across modules.
- Provisioned AWS EC2 and S3 infrastructure and introduced automated end-to-end testing with Cypress, increasing release confidence on the frontend.

Full Stack Developer · Intern, State University of Maringá

2023 – 2024 · uem.br

- Built an entomological surveillance system for arbovirus control (SESA/PR × UEM partnership) covering outbreak registration and georeferencing, field-agent notifications, an epidemiological monitoring dashboard, role-based access control (agent, supervisor, manager), and report export.
- Developed the web application with Angular and Spring Boot, and the native mobile app in Java using Android Studio.
- Rolled out statewide, covering all municipalities of Paraná, reducing outbreak-reporting time and improving field oversight.

PROJECTS

Nest & Express API

github.com/GuiSebax/Nest-Express-API · Node.js · TypeScript · Express.js · NestJS · Prisma ORM · PostgreSQL

Built two equivalent backends using Express and NestJS to compare architectures, patterns, and developer experience within the Node.js ecosystem, highlighting the difference between a minimalist and a structured approach.

Marketplace · Fullstack Application

github.com/GuiSebax/MarketPlace · React · Vite · Tailwind CSS · Node.js · Express · TypeScript

Built a marketplace application in a monorepo with a React/Vite frontend and an Express/TypeScript backend, to practice layer integration and evaluate AI-assisted development while keeping all architectural decisions under manual review.

Padilha Legal Hub · Institutional Landing Page

github.com/GuiSebax/padilha-legal-hub · padilhaepadilha.com.br · React · Tailwind CSS · TypeScript · Vite

Developed an institutional landing page for an agribusiness law firm, currently in production, focused on responsive layout, load performance, and service presentation for client acquisition.

Multi-Tenant SaaS Billing Platform

github.com/GuiSebax/SaaS-Multi-Tenant-Billing · Next.js · Tailwind CSS · NestJS · PostgreSQL + RLS · Drizzle · Redis + BullMQ · Stripe (Checkout + Webhooks + Portal) · JWT · Resend

Built a production-grade B2B project management platform (inspired by Notion/Linear) as a portfolio project demonstrating real multi-tenancy, Stripe billing, and row-level data isolation implemented at the database layer.

Task Manager

github.com/GuiSebax/task-manager · Next.js · Tailwind CSS · TypeScript · Clerk · Axios · Node.js + Fastify · Zod · Prisma ORM · PostgreSQL · Supabase · Vercel · Railway

Built a full-stack web application for personal task management, featuring task creation, filtering, and tracking by category, priority, and deadline, with a professional dark-themed UI and secure authentication via Clerk.

EDUCATION

Bachelor's Degree in Computer Science

State University of Maringá · uem.br

2021 – 2025 · Graduated with Academic Honors
